

Case study: Housing patterns and contrasts in an urban area:

- i) Name the place
- ii) Describe the contrasts in housing provision
- iii) Explain the reasons for this contrast

Case study: A place where retail provision (shopping patterns) has changed within one urban area.

- (i) Name a place you have studied where retail provision has changed.
- (ii) Describe how the retail provision has changed.
- (iii) Explain how the change affected different groups of people

Case study: Another Service provision within an urban area:

- i) Describe the distribution of the service
- ii) Explain the factors that enable people to access the service

Case study: Rural to Urban migration

- (i) Name a place from where people have migrated.
- (ii) Describe the place they migrated away from.
- (iii) Explain why they moved away. Refer to push and pull factors.

Case study: A planning issue in an urban area.

- i) Name the planning issue
- ii) Describe the planning issue
- iii) Explain the views of different stakeholders (Positive & Negative)

Case study: Conflict of leisure use of rural areas:

- i) Name the place
- ii) Describe the conflicts that take place
- iii) Explain how the problem can be managed sustainably

Case study: An extreme weather event: For a named weather event you have studied, caused by a low pressure weather system, describe and explain:

- i) How the weather event formed.
- ii) Its effects on people and the environment.

Case study: The impact of human activity on an ecosystem.

- i) Name and locate an ecosystem you have studied.
- (ii) Describe the structure of the ecosystem. Refer to plants and animals. Draw diagrams if you wish.
- (iii) Explain how and why people are changing (or have changed) the ecosystem structure.

Case study: A case study of an area suffering from desertification: causes, effects and management.

- i) Name the place
- ii) Describe the causes of desertification
- iii) Explain how desertification has been managed sustainably

Case study: A case study of a river flood at a regional scale: The physical and human causes and effects.

- Name the place
- Explain the causes of the flood
- Describe the effects of the flood on people and the environment.

Case Study: A case study of management of a river at a local scale.

i) Name the place

ii) Describe and explain why the flood management was needed

Case Study: A case study of a coastal environment: A coastline that has been managed by people

- Describe the problem
- Explain what has been done to manage the coast.

Case study: A case study of one industry changing location:

- i) Name the industry
- ii) Describe why it moved location
- iii) Explain the impacts of this change on different groups of people

Case study: A multi-national company.

- Name the company and describe its location
- Explain the impacts of the company on different groups of people

Case Study: A case study at the local scale of the impact of economic activity on the environment.

- Name the place and economic activity
- Describe the economic activity
- Explain how the environment was affected.

Case Study: A case study to explore differing views surrounding the management of climate change at the local, national and international scale.

- i) Name a place or places
- ii) Describe what is being done to combat climate change
- iii) Explain how these ideas might work

Case Study: A case study of a trans - boundary water issue.

- (i) Name a place where the supply of water has been, or is being, changed by people.
- (ii) Describe how the supply of water was, or is being, changed.
- (iii) Explain how the changing water supply is affecting, or will affect, different groups of people or organisations.

Case Study: A case study of aid:

- Name the place that has received aid
- Describe why the aid was needed
- Explain how the aid helped people.

Just in case☺: A landform created by the erosion of the sea.

Choose a landform you have studied and:

- Name the landform
- Explain its formation
- Explain how the landform is used by people
